Agency response

Once again it shows us over stopping blacks. Since our population is predominately white, stopping one black puts us over the disparity index. As noted, no searches were conducted on blacks. We have a major highway running through town that connects larger cities, so different races have the potential to be stopped for valid offenses. Stopping one or six blacks in a year certainly does not show our department is profiling as this data suggests.

Agency response

We have 4 major shopping centers and 6 strip malls with a total of 165 retail stores and 9 banks. We have 2 interstate highways that access our city with approximately 170,000 vehicles per day per highway. Our daytime population is approximately 50,000 and our city is located next to the St. Louis county courts, jail, and Government Center. In addition, our neighboring communities to our north and east have major shopping centers, which contain approximately 130 additional retail stores on our city borders.

Agency response

Carthage continues to have one of the largest percentages of undocumented Hispanic workers in the State. Immigration authorities in Springfield would support this statement. Carthage has at least four major employers who hire large numbers of Hispanic workers. While the census shows only 8.1% of the local population to be Hispanic, I firmly believe the true percentage to be approximately 25%. I believe that percentage speaks to the number of car stops. As to the number of searches in relation to car stops, a review of the statistics will show that the vast majority of searches are incident to arrest, a search that is not driven by officer discretion.

Agency response

Interstate highway I-170 dissects our city in half. There are approximately 112,000 vehicles that travel this section of highway in a 24-hour period. These statistics were provided by MoDOT in their most recent traffic survey. We also have State Hwy. 180 (St. Charles Rock Road) which is on our northern boundary of our city. I have no statistics on the number of vehicles that travel this highway, however, I am sure that it is a significant number. I believe that these two highways that run through and border our city have a bearing and is a factor in our overall demographics. The City of Charlack lies directly west of two cities and an unincorporated area of St. Louis County, with a large minority population (upwards from 90 percent), and St. Louis City directly after them. Both Hwy. 180 and I-170 are widely used by the minority population to access grocery stores and shopping malls located within close proximity of our city or they are accessed by cutting through our city.

Agency response

Our population, for purposes of this report, is shown at 36,494. That reflects the population of the city of persons ages 16 and over. Our disparity index regarding traffic stops of black motorists is 3.37. Reflecting that on a percentage basis, based on our population of African Americans residing in the City of Chesterfield, we stopped black motorists at a rate three times greater than white motorists. I feel it is important to point out that this can be somewhat misleading in that these calculations take into account only the African American residential population and not the driving population. In my opinion, although the driving population figure is unknown, it would be a much more accurate number to work with. A major interstate dissects the City, Chesterfield Mall, Chesterfield Commons, and the industrial center around the Spirit of St. Louis Airport attracts and employs many non-resident individuals. The City of Chesterfield is a major employment center for the greater St. Louis area but has a low number of permanent African American residents. The factors mentioned above will account for the number of traffic stops involving this very mobile minority driving population.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan Area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard, and Forsyth Boulevard. Therefore, it is felt that, for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan Area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton. 27% of all traffic stops made by the Clinton Police Department take place on state highways. Given the number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

RACIAL PROFILING DATA/2005

Agency: Cole Camp Police Dept.

Population: 922

age 16 and over

Agency response

El Dorado Springs is located on US 54 Highway that is purported to be a main route across the state outside of the interstate system. In addition, we are located on two Missouri routes that connect metropolitan areas to Stockton, Truman, Pomme de Terre, Lake of the Ozarks and many other tourist destinations within the state. Many non-residents pass through El Dorado Springs with 25 percent of all traffic stops made taking place on US or state highways. The data not represented concerns whether the subject stopped is a resident or non-resident of our jurisdiction. This skews any data comparison using the population of El Dorado Springs as a basis for calculation and any results comparatively derived is inherently flawed. The El Dorado Springs Police Department is committed to equal protection and service to our citizens and visitors alike.

Agency response

The City of Festus has a large interstate highway (I-55) that runs down the middle of the city along with a very busy state highway (Hwy. 61-67). These highways bring several different people from outside the area to our city. Our city also has several large retail establishments that people from all over come to patronize. There are several restaurants, gas stations, and hotels near our interstate exits that have the ability to cater to a large, diverse driving population. This area continues to grow with different restaurants and other retail locations being built.

Agency response

Our agency made 1,342 more traffic stops in 2005 than we did in 2004. We have increased the size of our department by 2, thus placing more traffic officers on the street. We have been more aggressive in traffic enforcement. US 54 passes through our jurisdiction, which is a major artery to the Lake of the Ozarks for persons living in the eastern half of Missouri. Many of the stops that we make are on this section of highway. There are several large employers in our city that employ large numbers of persons who do not live in the City of Fulton. Dollar General Warehouse, Fulton State Hospital, and the Department of Corrections are 3 examples. We also have 2 colleges with students from all 50 states. These students have visitors throughout the year who are also not residents of the city. According to the recent census figures that the Attorney General's Office is using for the first time this year, the African American population for the city of Fulton dropped 2% from 15.44% to 13.41%. We dispute this and feel that figure should actually be closer to 15%. We have had an influx of minorities, African American and Hispanic, from the city of St. Louis. The change in percentage causes our disparity index to have risen from .97 to 1.34. This figure should be closer to 1.07.

Agency response

The City of Gladstone has three state highways and one interstate highway that run through the area. In addition, there is a major home improvement center located in the southwest corner of the City. This center draws retail business from throughout the area including residents from the State of Kansas. It is located in close proximity to three of the four highways that run through Gladstone. It should also be noted that the City of Gladstone is entirely landlocked by Kansas City, Missouri, with major thoroughfares that allow through travel by Kansas City residents. A review of the data submitted shows that 13.9% of the Blacks, 12.5% of the Hispanics and 19.7% of the Asians that my officers came into contact with occurred during stops on the highways that run through our city. In addition, we believe the data collected should include resident status to provide an accurate reflection of our community at large. Considering the boundaries of Gladstone, the surrounding areas and highways described would indicate that a large proportion of the drivers stopped in all races are not Gladstone residents. If this information was being utilized in the calculation of the disparity index, which measures against the community's population figures, then the disparity index should drop proportionately and reflect that there is not a disparity in Gladstone.

Agency response

Glendale is located in southwest St. Louis County. Our neighboring cities, Kirkwood, Rock Hill and Webster Groves, all have a more diverse population. We are surrounded by four major shopping centers. State Route #100 averages about 30,000 vehicles daily carrying commuters to work. Lockwood (10,560 vehicles/day) and Berry Road (9,080 vehicles/day) are main feeders to Interstate 44.

Agency response

A major interstate highway, I-44, runs through Greene County and carries a great deal of traffic from St. Louis to Tulsa, or more generally from the greater mid west to the southwestern U.S. As a result, over the years this route developed into a major drug "pipeline," or conduit for narcotics traffic. Our increased interdiction efforts in 2005 may skew our racial profiling data. Further, our relative proximity to the St. Louis, Kansas City, Tulsa, and Little Rock metro areas and the ease of transit, along not only I-44 but also US-65 and MO-13, increase the probability of encountering greater numbers of persons from varied racial and ethnic backgrounds than our permanent population base might otherwise reflect, and could yield a greater disparity index as a result. Finally, as the Springfield/Greene County metropolitan area is home to several institutions of higher education (notable among them, Missouri State University) all of which work towards recruiting students from more diverse and urban locales, we should expect to encounter more minorities on traffic stops than the percentage that our census figures establish as residents.

RACIAL PROFILING DATA/2005

Agency: Greenfield Police Dept.

Population: 1,005

age 16 and over

Agency response

The Henry County Sheriff's Office has a great deal of non-resident traffic through the county in the summer months because of Truman Lake and other recreational advantages within the county. We are also a primary travel point between Kansas City and the Lake of the Ozarks as well as Branson, Missouri. This factor causes our numbers to be out of balance with our actual county populations. A more accurate accounting would figure resident and non-resident status in calculating the disparity index. The Missouri State Highway Patrol, being a state agency, counts the entire state population, however, I question how many traffic stops they make on the inner city streets of the cities of Kansas City and St. Louis.

Agency response

US Hwy 54 divides the City of Holts Summit north to south. US Hwy 54 is a major thoroughfare from the I-70/City of Fulton area to the Jefferson City/Lake of the Ozarks area. A review of the traffic stop data indicates a disparity index of 2.62 for "Black." The disparity index is based on a comparison of the number of stops and the local population representation for the specific "race." The data collection is based on the vehicular population of the city vs. the residential population of the city and is, therefore, an invalid indicator of any racial profiling problem. Due to the close proximity of the City of Fulton, Holts Summit, and Jefferson City to each other along US 54, a true representation of 38% of the stops under "black" would have to take into account the significantly higher populations of those other cities (respectively, 15.44 and 15.19 in 2004). Anytime percentages are used to represent any issue, the smaller the data set, the less reliable the percentage can represent the issue. This was significantly demonstrated in 2001 when only 2 Asians were stopped, divided by the local population percentage of 0.09, indicating a disparity index of 2.86. Looking at the disparity index only would lead a person who does not understand the data to believe there was a significant problem. The small numbers used in the data set for 2005 also demonstrate this problem. In 2005 only 52 stops were conducted under the "black" race section.

Agency response

The Independence Police Department is an internationally accredited agency that does not tolerate racial profiling. Officers receive annual training on cultural challenges and issues. Although Independence has a minority population of 11.27%, it shares its borders with Kansas City, Missouri, with a minority population of 40.5%. I-70 is a major roadway to shopping and economic opportunities between the two cities. Missouri highway counts show a daily count of 15,377 vehicles that enter Independence from Kansas City that do not continue east out of the city. The opportunity for employment and services creates a higher minority population than census indicates.

Agency response

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70, that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 1.8 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. A software transition from scanned forms to a fully-automated data collection system resulted in arrests being counted only as a result of search. By design, the form on which the AG office submitted the summary report did not include the new category Stop Outcome "Other," which accounted for 3,375 stops. The Total Stops figure, however, includes stops associated with this new category. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Agency response

Kirksville is home to two major universities whose enrollment date is not typically reflected in the census figures. Truman State University and Kirksville College of Osteopathic Medicine account for an additional 6,000 students/residents (in 2003, 16 percent of whom are identified as other than white, and 96 percent comes from outside Kirksville, including at least 26 international students). Kirksville is located on one of the few major north-south state highways (Highway 63) that services northern Missouri and southern Iowa. 8,700 vehicles per day travel the highway into and out of town. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

Agency response

Lafayette County is transected from east to west by a major highway, Interstate 70. Lafayette County has a large Hispanic migrant population due to agriculture (apple & peach orchards).

Agency response

The City of Lake Lotawana, MO, is located in Jackson County, MO, a first class county with a population in excess of 660,000. Missouri Route 7 and U.S. 50 Hwy. are both within our city limits and are utilized by thousands of motorists per day. The only motorists stopped are those who commit traffic violations or are involved in suspected criminal activity, regardless of race.

RACIAL PROFILING DATA/2005

Agency response

Interstate 70 borders the City of Lake Saint Louis to the north and U.S. 40/61 bisects the south end of the municipality, resulting in a fair amount of non-local traffic. Consequently, many drivers stopped for traffic violations in this venue are non-residents. Because of this, calculating a disparity index based on a comparison of ethnicity of drivers stopped with the ethnicity of the local population may be misleading. For example, while the disparity index for blacks indicates over-representation when based on local population (3.19), under-representation is indicated when the comparison is calculated based on statewide population (0.67).

Agency response

Marshall has a major north/south highway (U.S. 65) running through it, along with a primary east/west Interstate highway (Interstate 70) located just 10 miles south of Marshall. Marshall has two major employers, Cargill Meat Solutions and ConAgra Frozen Foods, of which a large portion of their workforce are minority workers. For example, Cargill has 250 Hispanic workers and ConAgra has 242 Hispanic workers. Marshall is home to Missouri Valley College, a liberal arts college, which has many minority students as part of their student body. Marshall Habilitation Center, a state facility for the mentally and physically disabled, also has a very large workforce.

Agency response

Maryland Heights has 1,672 businesses which employ 53,000 people. The city contains the Harrah's Casino, which had 9,600,000 visitors in 2005. The UMB Bank Pavilion Amphitheater, which seats 20,000, had 280,954 visitors in 2005. The city has 20 hotels with 3,512 rooms. Maryland Heights has 65 liquor establishments selling alcohol by the drink. Finally, the section of I-270 in Maryland Heights has an average daily traffic count reported by MoDOT of 157,111 vehicles, second highest in the state. The annual demographics of the 57,345,515 vehicles on I-270, 9,600,000 visitors to the casino, 280,954 visitors to the amphitheater, and the 53,000 people employed in Maryland Heights are not known and impact the validity of this report.

Agency response

The majority of the driving public in our jurisdiction is that of tourists traveling to vacation at the Lake of the Ozarks. This group is usually that of younger individuals and they come from several different states.

Agency response

North Kansas City has a list of demographics that make it a challenge to discern meaningful data regarding racial profiling analysis. The city is only 4.3 square miles, with less than 4,000 residents. However, 6 highways travel through the city limits carrying an estimated 200,000 vehicles a day. Furthermore, the city's daily workforce/daytime population is estimated at 30,000 people at over 1,100 businesses. There is no information regarding the race/sex make up of the daily motorists or the work force. Due to the small size of the department, we are able to compare individual officer's statistics with other officers working in a similar environment.

Agency response

The City of Osage Beach has seen many changes from its rural beginnings to its present year round "Heart of the Lake of the Ozarks" ever rising tourism population and home of the region's largest factory outlet shopping mall. While the 2000 census estimate of the city's resident population is at 3,662, it is estimated that in excess of 100,000 people are present in the area during peak seasonal periods.

Agency response

The over-representation of Hispanic and Black subjects in the racial profiling records is affected by an elevated rate of these persons traveling into and through Pettis County from outside our jurisdiction. Two major thoroughfares, US 50 and US 65 highways, intersect within the county, and a significant number of racial and ethnic minorities are employed by major food processing plants within and near the county's boundaries.

Agency response

Per the MoDOT District 4 Traffic Volume Map dated 2004, the estimated daily count through our city was approximately 182,603 vehicles per day. I would believe that the actual number has increased since 2004.

RACIAL PROFILING DATA/2005

Agency: Plattsburg Police Dept.

Population: 2,016

age 16 and over

Agency: Polo Police Dept.

Population: 460

age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	102	100	1	1	0	0	0
Searches	8	8	0	0	0	0	0
Arrests	6	6	0	0	0	0	0
Statewide population %	N/A	84.26	10.63	2.22	1.38	0.46	1.06
Local population %	N/A	98.91	0.00	0.87	0.00	0.00	0.43
Disparity index	N/A	0.99	#Error	1.13	#Error	#Error	0.00
Search rate	7.84	8.00	0.00	0.00	#Error	#Error	#Error
Contraband hit rate	50.00	50.00	#Error	#Error	#Error	#Error	#Error
Arrest rate	5.88	6.00	0.00	0.00	#Error	#Error	#Error

Notes: Population figures are 2005 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Agency response

Raytown has numerous main traffic routes through the city, including Missouri 350 Highway. The Raytown School District serves a population of 60,000, while our city has a population of 30,000 and 10 square miles. Approximately 66% of our stops are non-Raytown residents.

Agency response

The City of Richmond Heights is a 2.8 sq. mile city incorporated in 1913 located on the western boundaries of the City of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly through it. Highway I-170 runs north and south from U.S. 64 to the city limits of Clayton. Located in Richmond Heights is the Galleria shopping mall and the new Boulevard Shopping District. The Galleria Mall and the Boulevard generate approximately 11 million shoppers or visitors each year. Richmond Heights also borders the City of Clayton, which is the county seat for St. Louis County. Thousands of vehicles travel through Richmond Heights on a daily basis due to its geographic location. Estimated daytime population of Richmond Heights is 26,000.

Agency response

Smithville is a small community that neighbors Kansas City. With the Smithville Lake nearby, the number of vehicles traveling through the city is disproportionate to the population. This seems to skew our index numbers every year.

Agency response

We have a large chicken processing plant in our city that employs a large number of Hispanics. We are also in an area with Arkansas on one side of town and Oklahoma on another. There is quite a bit of interstate traffic through our town.

Agency response

Interstate Hwy 70 essentially divides the city in half. The interstate, aside from carrying interstate traffic, is the main artery carrying daily commuter traffic from St. Charles City and cities west of St. Charles to the Greater St. Louis Area. St. Charles City also contains two highly traveled state highways, Hwy 94 and Hwy 370, which also serve as main arterial routes. State Hwy 364, to a lesser degree, impacts traffic volume in the city. St. Charles City is the county seat and contains the county jail, county courts building and all of the county's administrative offices. All such business conducted in person with county government is conducted in St. Charles City and greatly contributes to traffic in the city's core business area. The Historic Main Street District is the site of approximately 33 festivals drawing crowds from hundreds of miles. Even beyond the schedule's festivals, the city's historic district and Frontier Park are daily attractions for tourist traffic from outside the city. The St. Charles Family Arena is an events style facility with seating for over 11,000 and hosts its own busy schedule of concert, sports and entertainment programs. The Ameristar Casino is contained in the city limits and draws thousands of visitors daily from far beyond the City of St. Charles. The casino is also one of the city's biggest employers. Lindenwood University, within the city limits, provides education and boarding to a large national and international student body. Sanford Brown College and other small business and technical colleges within the city limits bring in students daily from outside the city.

Agency response

The City of St. John has two (2) state highways traversing through the city from east to west which account for 50.8% of traffic stops. Directly to the east of St. John lies several communities with a very high concentration of a minority population. These two highways are direct conduits from these communities to a major shopping mall, the first grocery store west of their city limits, numerous fast food restaurants and the airport. The percentage of minorities who use these streets are over 3 times more than the population of the City of St. John which skews the proportionate numbers in the disparity index.

Agency response

Two important system changes occurred in 2005. This year was the first year that all vehicle stops were required to be reported. Previously, only stops for traffic violations were reported. The new category of Investigative Stops made up 11.23% (6,073) of the 2005 total. Additionally, electronic reporting replaced Scantron reporting this year. The persons stopped in vehicles were searched by police 6.6% of the time (3,586 to 54,063). Much of the search to stop ratio may be explained by the fact that Investigative Stops are now included in the report. This category of stop includes suspicious vehicle checks and wanted vehicle stops. In 1,900 of the 3,586 cases, the driver had an outstanding arrest warrant that requires a custodial search. There were 1,586 African-American and 298 white arrests made for arrests warrants following a vehicle stop. The remaining 16 arrests were of other races/ethnicities. There were 1597 stops where a search was conducted on a white or African-American. Of that number, 1001 (62.7%) were African-American and 596 (37.3%) were white. The disparity was a result of 405 more searches of African-Americans.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the city of St. Louis and, therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. Our Department policy specifies that race-based detentions, traffic stops, arrests, searches and seizures of property are forbidden. In 2005, our Department received 355,379 calls for service; officers made 18,743 full-custody arrests and 59,935 traffic stops with no complaints of racial profiling. All commissioned officers participate in annual cultural diversity and sensitivity training and specialized training that prohibits the illegal practice of racial profiling. Supervisors review traffic stop data on a quarterly basis to ensure that officers do not engage in biased-based policing.

Agency response

The following conditions may influence minority contacts in St. Peters. Interstate Highway 70 and Missouri Highways 94, 370 and 364 pass through or terminate within the City. Westfield Shopping Town Mid-Rivers Mall, a major retail development, is located along Interstate 70 and Highway 370. The community is home to several regionally significant office and professional campuses; and employees of local businesses, commuter traffic and retail customers significantly increase the non-resident driving population.

Agency response

It is unfortunate that our disparity index is based upon the population demographics of the City of Town and Country, which has a population of approximately 11,000 people with an African American population of 1.98 percent. Nearly 400,000 motorists travel through our city limits each weekday with the second most voluminous interchange in the state (Interstates 64 and I-270). Our motoring public is reflective of the demographics of the state and St. Louis County, which are comprised of African American populations of 10.25 and 19 percent, respectively. The traffic stop data for Town and Country police officers indicates that only two percent of the motorists stopped are residents of Town and Country. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and county demographics, not the City of Town and Country. The Town and Country Police Department is committed to the fair and impartial application of the law while attempting to maintain a safe environment for all people who travel in and through our city limits. A careful examination of the data indicates that our practice matches this policy.

Agency response

We are very unique in our population because of our role in the community. We are a University police department with approximately 16,000 students and another 3,000 faculty and staff personnel. Our student population is a diverse cross mix of international students and local community participants. Furthermore, the "transient" or "passing through" driving population is such that it is unmeasurable. There are no real community standards or city to base our population on that would be an accurate depiction of our University. In addition, the amount of visitors to our campus for various functions is also unmeasurable. It is unknown what percentages of stops are made on University related people, and the number that is just because of happenstance.

Agency response

The Henry County Sheriff's Office has a great deal of non-resident traffic through the Windsor community because of the Missouri State Fair and Whiteman Air Force Base. These factors cause our numbers to be out of balance with our actual county populations. A more accurate accounting would figure resident and non-resident status in calculating the disparity index.

Arrest rate	3.81	3.83	#Error	0.00	#Error	#Error	#Error

Notes: Population figures are 2005 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.
